

REMARKS

In response to the restriction requirement in the Official Action mailed October 1, 2004, Applicant hereby elects without traverse Invention II, drawn to a method of manufacturing a display panel. It is noted that the Official Action indicates that claims 73, 76, and 79 belong in Group I drawn to a method of making a thin film transistor in an on state before forming a pixel electrode. Applicant respectfully traverses this finding in that claims 73, 76, and 79 are believed to be drawn to a method of manufacturing a display panel. As such, claims 43-92 are believed to be elected and proper for examination at this time.

Claims 1-42 have been canceled. Furthermore, new claims 94-123 have been added to recite additional protection to which the applicant is entitled and thus claims 43-123 remain pending for examination.

Examination on the merits is requested.

Respectfully submitted,

Eric J. Robinson
